World Environment day is celebrated annually on 5th June and was started by the United Nations General Assembly to encourage awareness and action for the protection of the environment. The theme for this year's World Environment Day was 'Invest in our planet to foster climate action''. We aimed to satisfy this goal by involving the public in cleaning up the land pollution that has occurred in Kitengela road- southlands slum (Lang'ata). That has enabled the masses to understand the implications that our actions have towards the environment. Littering the land will cost us our clean water, food, fertile soil and foliage cover. Proper waste management will protect our land, water and air from pollution.

We chose this area because we noticed it suffers the consequences of improper management of solid waste. That activity has enabled us to send an encouraging message to the citizens residing in that area to take a step forward in maintaining their wastes.

Tree Planting Exercise

The exercise was successful within the compound of Ngei primary .We were able to plant 120 tree seedlings of different indigenous trees and fruit trees. We involved the community and pupils to this noble task where we first sensitized on the importance of planting trees and disposing of waste correctly and recycling.. Notable names of the seedlings we were able to plant:

- a) Crotonmegalocurpus (Mukinduri in kikuyu)*
- c) Carosina*
- d) Graveria*
- e) mango*
- f) guava*
- g) Cyprus*
- h) avocado*

Mental Health Talk

The greatest concern was to reduce the recent cases of youth dying by suicide and creating a youth value addition in the society body and for future growth.

The Organizing Committee that made this day a success, chaired by Darren Hart appreciates all the stakeholders who contributed in one way or another towards the success of it. We look forward to doing great of the same to make sure we make a difference.

CHALLENGES FACED AND WAY FORWARD

There was a challenge in meeting our targeted budget, going forward we will try to identify the companies that can fund us and write to them proposals early enough.

We noted that some organizations really want to be put on the poster but don't contribute anything on the budget, they don't do any cleaning or digging and

even mobilization of the event but they bring big burners to the event to take pictures with heavily equipped cameras. Next time we will let them commit to something before they join us.

We appreciate the help we received from the community, however, most of the got tired early leaving when we are still on cause. We tried to find the reason and it was clear that we started our even one hour late. Therefore, in future consideration we will take an initiative to sensitize the community to turn up on time as we also have to adjust our program. The program took longer than the planned time and so moving forward, we could do better as regards time management.
